

GNOSIS, THE HIGHEST KNOWLEDGE

“Heaven” is only 2 – 3 meters from ground
 “Hell” is Häll, Hella, just fireplace, now stove
 “God” is the penis, Tor, we are all “his” children
 IESUS – ies – yoke – yoga meditation
 Iesus is also said to have drunk his own sperm

Three very interesting books just happened lately to burst (my karma?) in front of me in the library, the first, published at 2007, “**Galileo, antichrist**” in which the writer, Michael White, explains the *main* reason in condemning of Galileo to be the result of his book “*Il Saggiatore*” (Assayer) in which he is giving hints that the “body and blood” (bread and wine) served at the **Last Supper**, could have been the sperm collected from the twelve Apostles. This has direct connections to the Bock Saga, if you know it. (Bröd-raskap, *bread-seed brothers*, the twelve brothers, sons of Ukko the Lord) The Apostles also had a meeting at the year 49 in which they decreed that the Christians do not have to obey the Jew law about the circumcision of their sons, (which enabled them to masturbate, to get their sperm out to be drunken, or to be offered to somebody else) which was the year when Christians separated from Jews.

The second book, “The 100 most influential books ever written”, by Martin Seymour-Smith, 1999, it’s part “The New Testament”, in which he is quoting the “*Gospel of Knowledge and Joy*” which was found from Nag Hammadi in Egypt only at 1945, and was translated into English at 1970’s. It was written by the *Gnostic* sect people into which also Jesus be-

longed, *what was also the reason why Jews wanted him to be condemned to death.* (The name of the sect comes from the Greek word “**Gnosis**”, **knowledge**) Judas has a purse of thirty coins in his hand (in Bock Saga the ejaculation of sperm is “Myntflod”, the stream of coins) in the Leonardo da Vinci painting “*The last supper*” which you can see at the net, there Judas is fourth from left, reaching his hand unto a piece of bread, which Jesus also is pointing with his hand. So Leonardo also was suspecting the same thing as Galileo one hundred years later. And if you look from the net again the picture of the *gravestone of Shakespeare*, **it’s text**, you’ll see that he too had the same idea, but again, only if you know the Bock Saga. Also Botticelli took part into this hide and seek game with Vatican with his painting “The Birth of Venus” in which we see that she is emerging from a seashell, Näkki!

The third book, published just three years ago, this time written in Finnish by three women doctors and researches of Helsinki University, “*Taivaallista seksiä*” (Heavenly sex) in which they go through the sex-parts of the Bible, but also some text from third century, by Bishop Epifanios, “*Medicin bag*”, who had got it from still earlier Gnostic text called the “*The big questions of Maria*”, **which**

says that Jesus made love with a woman and also drank his own sperm! And mind you, these are three doctors from Helsinki University, not just anybody from the street; they are “official” people!!

Still, about the Greek name **IESUS**, from which you can omit the last two letters, which will left only the name as “**IES**” which is Finnish (and “rot”) name for “yoke” which again is close to “Yoga” what one has to practice and meditate *to get off from under the yoke, which is the passions of sex and other bodily inconsistencies*. Now you will see how important it is to know the Bock Saga, and the “rot” and “van” languages, without them the world history, as well as the history of these three religions, do not open. Anyway, now we know that *Ior Bock* has been right all the time, these books prove it.

But now, back to the Apostles at AD 49 meeting, where they decided **not to cut** the foreskin from the young boys, the reason for it, **they can masturbate easily and get their sperm out**, to drink it themselves or give it as an offering to others, what the Jews and Moslems cannot do, and *that seems to be the reason for the death penalty for Jesus, given by Jews!*

Another thing, why do you think that boys and men all over the world seem to know the custom to throw flat small stones to the water and see how many times they jump up? Well, again we have to use the Rot and Van languages to get this right. We say that we throw sandwiches, but to who? To Näkki, to Ahti or Väinämöinen, Vesihäisi in Finnish, Water serpent, or *Dragon*, if you like it better. But sandwich is a “bread” (bröd) and there is butter, “voi” in Finnish, “smör” in Rot, with scrambled eggs on top of it, which is in this case again just plain SPERM! So here we again hit the “bröd-ra-skap” or twelve brothers giving their honey-nectar out to the Ukko. (We have a special oval (vagina, what it represents) shaped pie with boiled rice in it, here in Finland, called “The Karelian pie”, on top of which we put the butter and scrambled

eggs, and what was eaten only at very special erotic occasions, at Christmas time, but what is now very popular everyday enjoyment to munch between meals. (Just think, vagina, with sperm on it, wham!)

THE “HEAVEN” IS ONLY 2-3 METERS FROM GROUND!

Yes, that is so, it is a thin, tent-like draper with pictures of Sun, Moon and stars, above the poster bed that was raised on a platform, with seven steps to get up, when Lemminkäinen and Suometar, the God and Goddess of Fertility, spent their wedding night, and only then.

“HELL” IS ONLY A FIREPLACE!

Yes, HELLA in Finnish, HÄLL in “Rot”, just a **stove**, even if it is a gas or electric stove, still only a **ancient fireplace**, nothing else! (Well, there is a high rock here in Helsinki,

also called the “Berghäll”, (Bedrock mountain) on which the full bearded “Ukko” may have been sitting, with a bonfire close by, seeing people who came to ask advise)

PENIS IS THE “GOD”!

Oh yes, we are all “his” children, that’s why we have been forbidden to draw pictures of “God”, ever since the beginning of these three religions, Christian, Jew and Moslem.

All of the old words used in law courts in Finland tell us the same story, they all show how to offer your sperm to either Ukko or Lemminkäinen, as there is a “maistraati” in which “maist” is “to taste”, the sperm offered, and what about the “Por”-mestari then? (Por is the side of the mouth) That’s **cultur**, isn’t it, but “**cult (of) Tur!**” Finland used to be “Vinland” earlier, that is “Spermland” on as late as a Dutch 1675 and 1700 maps.

There is still another very interesting book to read, the Rot-Finnish *Almanac*, which comes out every year, printed here in Finland, in which are the name-days from the “pagan” times still to be wondered. There are the days for “Dick”, for example, at 7th of February, Valentin at 14th, Christoffer (Christ offer?) at 15th of March, **Sampo**, a special Finnish name of a man, at 3rd of April, and the next day is for **Ukko, (Odin) Rhea** is at 8th April, 1st of May is Maj and Valborg, when the unmarried women chose their women partners, Frej and Freja are together at 6th of May, **Flora** (the prostitute who established Rome) at 13th of May, at 23rd of May those women who were allowed to have children started to enjoy the sperm/nectar offered to them, as just one moon cycle after they, at Midsummer night, made love with the men they had chosen for themselves, 7th of July is the big day, the “**Klas**”, which mean the sperm/seed of **Noakh**, 7th of September is **Regina and Roy**, the Queen and King, then at 6th of December is the day of **Nikolaus**, the Yule-Bock, who is definitely Finnish, starting the Yule season, and 15th is for **the Noah** (which name mean the Vinberries with seeds inside, and the balls with

their seeds) and of course the **Adam and Eva** at 24th of December.

WHEN NOAKH RESIDED IN FINLAND!

Noakh resided at imaginary North Pole, under the North Star, in Finland (then Vinland, Spermland) from where he sent his three sons, Haam, Seem and Jafet to East, South and West, respectively, to rule the world, according to the last Roman catholic Arch Bishop Olaus Magnus, of Sweden, at AD 1523, in his book Carta Gothica.

Name days were important at olden times, as that of Noah’s seed, **Klas**, at 7/7, what was still more important at 1807 when Napoleon and Aleksander I decided to take Finland away from Sweden to be the Grand Duchy under the Russian Tsar, 07, 07, 07, **Jack pot**. Same happened again with the declaration of independence of Finland at 6th of December which is the day of **Nikolaus**, the Yule Bock, Lemminkäinen, who resided in Lapland for 200 years, from 1050 to 1250, from which time we have the “Santa” stories.

There are still many other important days but again only if you know the Rot and Van languages and the Bock Saga they have any meaning. Anyway, it is really one of the most interesting book, as it derives from the time before these three religions, from the paradise time, before the Ice-age. These names are inside the original Moon calendar, so that they appear mostly at the *Full Moon* days, but also other Moon cycles are in it. *New moon* day is the “disaster” day, “dis aster” at Rome, the “Black day” when you are not supposed to do or start anything important, here in Finland, as the energies of the Moon are so shaky at that day, then it’s better to stay put and lie in your bunk only.

This would be so much easier to explain in Finnish, (which, along with Rot, were the first spoken languages, Finnish being “constructed” as a fully phonetic language in which every individual letter is always pronounced the same way, no matter in which word it is in, from the sounds of Rot) and I used twelve

GNOSIS, THE HIGHEST KNOWLEDGE

sheets to tell everything about this case, but I'm so glad that now we have an "official" explanation to sperm drinking (by Jesus) that can be explained in English too.

How else are you going to explain the nearly one thousand years long lives of Abraham and his sons and grandsons until it started to diminish after many centuries, if not with this drinking the very energetic sperm, which has power as no food can ever give ! That can be proved by testing the energies of Ior Bock himself, from his wrists, the Chinese way, they are such that I have not found from anybody else, as he has been drinking his own sperm nearly half a century, until he was stabbed with knife at 1999 that made him over 80 % invalid, limbs paralyzed.

There are also emblems of the Gnosis, (Knowledge, also Sapiens, which means, to drink the sperm to increase the knowledge) **the Swastika** (Suasti in Sanskrit = sant skrift, *true writing*, in Rot) which is a very old Finnish Yule-time decoration, made from straws that were filled with sulphur and burned after the Christmas, showering sparks around. When you look at it as turning the anti-clock way, it means **Knowledge**, at clock-wise it means **Fertility!** *And, the Finnish flag of Finland's president is the only one in the world where the Swastika still is, at anti-clock , the knowledge way!*
